

## **Environmental Policy as per our Tanner:**

Our Supplier/Tannery confirms the following as per an official document address to African Leather:

- The most important objectives are the safety of its activities and protection of its staff and the environment.
- The Tannery has an ESH (Environment, Safety and Health) program in place.
- The Tannery complies with all applicable rules and regulation of the City.
- Suppliers of chemicals and services are carefully selected taking into account the ESH performance.
- They strive to save water and energy during their production process.
- Waste management treat all waste generated and recycle waste where possible.
- They use recyclable packaging materials.
- They use zero solvent based finishing products to protect the environment.
- They do not use chrome 6 or any other banned or environmentally harmful chemicals in their processing.

Kind Regards

Ian Otto  
Director
